

ModelSnapshot

```
classDiagram
    class ModelSnapshot {
    }
    class KyooPostgresqlMigrationsPostgresContextModelSnapshot {
        # BuildModel()
    }
    KyooPostgresqlMigrationsPostgresContextModelSnapshot --|> ModelSnapshot
```

The diagram illustrates a class hierarchy. At the top is the 'ModelSnapshot' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. At the bottom is the 'Kyoo.Postgresql.Migrations.PostgresContextModelSnapshot' class, represented by a shaded rectangle with three horizontal compartments. The top compartment contains the class name. The middle compartment is empty. The bottom compartment contains the method signature '# BuildModel()'. A blue arrow with an open triangular head points from the top of the bottom class to the bottom of the top class, indicating inheritance.

Kyoo.Postgresql.Migrations.
PostgresContextModelSnapshot

BuildModel()
