

IFilterMetadata

```
classDiagram
    class IFilterMetadata {
    }
    class KyooControllersPassthroughPermissionValidatorPassthroughValidator {
    }
    KyooControllersPassthroughPermissionValidatorPassthroughValidator --|> IFilterMetadata
```

The diagram illustrates a class hierarchy. At the top is the `IFilterMetadata` interface, represented by a box with three horizontal compartments. The top compartment contains the text `IFilterMetadata`, while the other two are empty. Below it is the `Kyoo.Controllers.PassthroughPermissionValidator.PassthroughValidator` class, represented by a box with three horizontal compartments. The top compartment contains the text `Kyoo.Controllers.PassthroughPermissionValidator.PassthroughValidator`, while the other two are empty. A blue arrow with an open triangular head points from the top compartment of the class box to the bottom compartment of the interface box, indicating that the class inherits from or implements the interface.

Kyoo.Controllers.Passthrough
PermissionValidator.Passthrough
